Detailed Action

Drawings

Objections

1. The drawings are objected to because of the following. The label of transparent plate 14a depicted in Fig. 1 should be changed to 14 as per the description of the plate given in the Applicant's specification (see paragraph 1 of the Applicant's *Background of the Invention*). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a. *Species One*. Species One is depicted in Figs. 2-4 and corresponds to the fingerprint identification apparatus set forth in Claim 2.
- b. *Species Two*. Species Two is depicted in Figs. 5-7 and corresponds to the fingerprint identification apparatus set forth in Claim 3.
- c. *Species Three*. Species Three is depicted in Figs. 8-10 and corresponds to the fingerprint identification apparatus set forth in Claim 4.

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 1 and 6-8 are generic.

Art Unit: 2623

4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

5. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

6. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Election By Telephone

7. A telephone call was made to Mr. Morton J. Rosenberg on May 27, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

9. The Applicant is reminded that the period for reply to this restriction requirement is set to expire ONE MONTHS from the mailing date of this action.
